## PROJECTS

---

### Beit Aziz - [beit-aziz.vercel.app/](https://beit-aziz.vercel.app/)

Aug 2023

- Developed a web application for a real client to enhance customer engagement and streamline reservation and order management.
- Create two websites Front-End and admin site (CMS)
- Utilized Django for backend development, PostgreSQL as DB, and Next.js for frontend.
- Done by two people within two weeks

### GeoGenius - [geogenius-ltuc.netlify.app/](https://geogenius-ltuc.netlify.app/)

Mar 2023

- Created an interactive web app allowing users to explore country-specific information by clicking on a map, and a simple quiz game, and you can answer by clicking on a map
- Implemented React components and established communication with a Node.js Express API server and PostgreSQL database.
- Done by a group of 5 people within only one week

### PriceWise - [github.com/Price-Wise/pricewise](https://github.com/Price-Wise/pricewise)

Jun 2023

- Designed and built an application for searching e-commerce websites and retrieving product details.
- Utilized Python along with Playwright and HTTPX for data scraping, and EEL for the user interface

### Facebook Clone - <https://ema-fb.netlify.app/>

Jul 2022

- Facebook clone that has some functionality like signup, login, post, like a post, and comments on post
- All component was created from scratch by me
- Created using ExpressJS with MongoDB, and ReactJS for the front end
